REQUEST FOR CERTIFICATE OF CORRECTION
OF APPLICANT'S MISTAKE, UNDER 37 C.F.R. 1.323

ATTN: Certificate of Correction Branch
Commissioner for Patents
P.O. Box 1450
Alexandria, Virginia 22313-1450

Dear Sir:

Pursuant to 35 U.S.C. 255 and 37 C.F.R. 1.323, issuance of the accompanying
proposed Certificate of Correction is respectfully requested. The Certificate corrects the
specification to contain a reference to International Application No. PCT/EP01/00526, having
an international filing date of January 18, 2001 and to indicate the disclosure (which issued as
U.S. Patent No. 6,770,680) is the United States national stage of that international
application. It is noted that 37 C.F.R. 1.78(a) provides that the specification must contain, or
be amended to contain, such a reference. It is respectfully submitted that a petition under 37
C.F.R. 1.78(a)(6) and surcharge under 37 C.F.R. 1.17(t) are not required, inasmuch as the

information concerning the claim of benefit of the filing date of the international application was recognized by the Patent and Trademark Office, as shown by its inclusion on the Filing Receipt mailed on March 28, 2002 (MPEP 201.11(III)(D)). The Patent and Trademark Office's recognition of the claim of benefit of the filing date of the international application is further evidenced by the Notice of Acceptance of Application Under 35 U.S.C. 371 and 37 C.F.R. 1.494 or 1.495, mailed March 28, 2002, as well as the cover sheets of Patent Application Publication No. US 2003/0010360A1, and issued U.S. Patent No. 6,770,680, which both include specific references to "PCT Filed: January 18, 2001", "PCT No. PCT/EP01/00526".

Because the application has already issued as a patent, the present Request for Certificate of Correction is respectfully submitted to be an appropriate manner of correcting the specification to include the specific benefit claim (MPEP 101.11 III.F.).

All of the requirements set forth in 37 C.F.R. 1.78(a)(1) have been met, inasmuch as the prior-filed international application designated the United States of America, named Klaus Klenk as the inventor (who is also the named inventor in the application which issued as U.S. Patent No. 6,770,680), and was entitled to an international filing date of January 18, 2001, in accordance with PCT Article 11.

It is clear from the record of the patent and the parent application that priority is appropriate. For example, as noted above, the Patent and Trademark Office recognized the claim of benefit of the filing date of the international application, as evidenced by the Filing Receipt and Notice of Acceptance of Application Under 35 U.S.C. 371 and 37 C.F.R. 1.494 or 1.495, both mailed March 28, 2002, and the cover sheets of Patent Application Publication No. US 2003/0010360A1 and issued U.S. Patent No. 6,770,680. Furthermore, the Transmittal Letter to the United States Designated/Elected Office (DO/EO/US) Concerning a Filing Under 35 U.S.C. 371 (form PCTUS1/REV03), filed by Express Mail on September 24, 2001, included a check in the box next to "This is an express request to begin national examination procedures (35 U.S.C. 371(f))." That Transmittal Letter also identified the application number and international filing date. The international application was filed within twelve months of the January 24, 2000 priority date, and the application which resulted in U.S. Patent No. 6,770,680 was timely filed on September 24, 2001 in the United States Patent and Trademark Office, i.e. within thirty months of the priority date. On

November 15, 2001, Applicant submitted a Preliminary Amendment and Substitute Specification, which were accompanied by a second Transmittal Letter to the United States Designated/Elected Office (DO/EO/US) Concerning a Filing Under 35 U.S.C. 371, which also identified the international application number and international filing date. That second Transmittal Letter included a check in the box next to "This is a SECOND or SUBSEQUENT submission of items concerning a filing under 35 U.S.C. 371."

Submitted herewith as copies of documentation showing the designation of states is a copy of the cover sheet to International Application Publication No. WO 01/55250 A1, in which the U.S. is listed as one of the designated countries. It is also noted that the assignee, Kronos AG, is listed as Applicant "für alle Bestimmungsstaaten mit Aushchme von US" (or "for all designated states except the US"), and the inventor, Klaus Klenk, is listed as the Application "num für US" (or "for the US only"). It is respectfully submitted that the U.S. Patent and Trademark Office may take Official Notice that such practice is standard only for applications designating the United States of America, as no other PCT signatory countries require the inventor, as opposed to a corporate entity, to be named as the Applicant. In further support of the present Request, copies of the following documents are submitted herewith to show that it is clear from the record that 35 USC 120 priority is appropriate:

- (i) Transmittal Letter submitted September 24, 2001;
- (ii) Second Transmittal Letter submitted November 21, 2001;
- (iii) Filing Receipt mailed March 28, 2002;
- (iv) Notice of Acceptance of Application Under 35 U.S.C. 371 and 37 C.F.R. 1.494 or 1.495, mailed March 28, 2002;
- (v) Cover Sheet of Patent Application Publication No. US 2003/0010360A1; and
- (vi) Cover Sheet of U.S. Patent No. 6,770,680.

A fee in the amount of \$100.00 as set forth in 37 C.F.R. 1.20(a) is also submitted for the requested Certificate of Correction of Applicant's Mistake under 37 C.F.R. 1.323. The

Commissioner is hereby authorized to charge any fee deficiency, or to credit any overpayments, to Deposit Account No. 13-2855 of the undersigned's firm under Order No. 30071/37749.

Dated: August 26, 2004

**LICENSE FOR FOREIGN FILING UNDER
Title 35, United States Code, Section 184
Title 37, Code of Federal Regulations, 5.11 & 5.15**

GRANTED

The applicant has been granted a license under 35 U.S.C. 184, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" followed by a date appears on this form. Such licenses are issued in all applications where the conditions for issuance of a license have been met, regardless of whether or not a license may be required as set forth in 37 CFR 5.15. The scope and limitations of this license are set forth in 37 CFR 5.15(a) unless an earlier license has been issued under 37 CFR 5.15(b). The license is subject to revocation upon written notification. The date indicated is the effective date of the license, unless an earlier license of similar scope has been granted under 37 CFR 5.13 or 5.14.

This license is to be retained by the licensee and may be used at any time on or after the effective date thereof unless it is revoked. This license is automatically transferred to any related applications(s) filed under 37 CFR 1.53(d). This license is not retroactive.

The grant of a license does not in any way lessen the responsibility of a licensee for the security of the subject matter as imposed by any Government contract or the provisions of existing laws relating to espionage and the national security or the export of technical data. Licensees should apprise themselves of current regulations especially with respect to certain countries, of other agencies, particularly the Office of Defense Trade Controls, Department of State (with respect to Arms, Munitions and Implements of War (22 CFR 121-128)); the Office of Export Administration, Department of Commerce (15 CFR 370.10 (j)); the Office of Foreign Assets Control, Department of Treasury (31 CFR Parts 500+) and the Department of Energy.

NOT GRANTED

No license under 35 U.S.C. 184 has been granted at this time, if the phrase "IF REQUIRED, FOREIGN FILING LICENSE GRANTED" DOES NOT appear on this form. Applicant may still petition for a license under 37 CFR 5.12, if a license is desired before the expiration of 6 months from the filing date of the application. If 6 months has lapsed from the filing date of this application and the licensee has not received any indication of a secrecy order under 35 U.S.C. 181, the licensee may foreign file the application pursuant to 37 CFR 5.15(b).
